Industrial Projects

tBooks

- tBooks provides platform to manage your company's shares and shareholders electronically. Its core feature involves Issue, Redeem and transfer, its being integrated with WeeSign(developed by Leewayhertz) for signing the document with blockchain which provides us high security and reliability.

Xinfin(XDC)

- XDC has many projects and i worked on some of them like Xinfin-xplorer, Xinfin-nft basically it's all related to blockchain smart contracts projects. XDC-NFT has android and iOS app where user can upload his/her content for sell and purchase. My work is to manage frontend and backend as per requirements.

AtlasClinic

- It's an webapp for physician doctors who can ask his/her query to specialist doctors. It has two portals one is admin another is pcp/consultant portal. Here user can upload the patients documents and ask his/her queries. My role is to manage the front end and backend as per client requirements.

VRS-Pet

- It's an webapp for pets where you can buy medicines, foods, toys etc. Here user can also take consultation for pets online and ask his/her queries. My role is to manage the front end and integration of apis.
